Cautions:

1. The given data are typical values. Due to tolerances of the production process and electrical components, values for light output can be ±15% and electrical power can be ±10%.
2. Up to 14.4W/M(4.39W/feet) no need for additional heat sinking on Alu profile, if more than 14.4W/M(4.39W/feet) must be used the heat sinking.
